[GitHub](#) | [Facebook](#)

Frontend developer, MERN stack familiar and very passionate about new technology. I want to move forward with a creative team where I can add value and become an industry.

Skills :

Expertise: HTML5, CSS3, Bootstrap, Tailwind, daisy UI, JavaScript, React.js, Firebase

Comfortable: Node.js, MongoDB, Express.js, Vercel

Tools: VS Code, Figma, GitHub, Netlify

Projects :

1. Bike-Store | [Live-link](#) | [Client-repository](#) | [Server-repository](#)

The website was made for old products to sell. People can create seller or buyer accounts. The seller can add products. (MERN Stack responsive website)

- Used MongoDB database, Authentication on Firebase
- Used React Router, Query, Toast

2. Online-Food | [Live-link](#) | [Client-repository](#) | [Server-repository](#)

The website is made for online food delivery in the local areas. (MERN Stack responsive website)

- Used MongoDB database, Authentication on Firebase
- Used React Router, react-photo-view

3. Skill-Share | [Live-link](#) | [GitHub-repository](#)

The website is made for online practice. Any person can test his/her learning. (Front End responsive website)

- Used React Router
 - Used bootstrap, vanilla CSS, sweetalert2
-
